## LAB# 3: INTRODUCTION TO MS POWER POINT

Microsoft PowerPoint is an electronic presentation program that helps people present a speech using a collection of slides. A PowerPoint presentation is a collection of slides that can be used to create oral presentations.

It is a speech with visuals. A well-designed visual can be just as powerful as the verbal part of a presentation. Remember “a picture is worth a thousand words”. Visuals should help to reinforce what one is saying. They should be simple in design, clear in the information that they are giving, and pleasing to look at. Visuals can be overheads, slides, or flipcharts, but more and more often, they are projections created using software on a computer. The projections, once created can be shown on a monitor, or projected onto a large screen while the presenter talks, such as a white board or smart board.

Power Point is a multimedia (text, graphics, sound, animations) slideshow tool that creates slide shows. Presentations software can be used to inform, educate interest, influence and/or sell an idea. Studies have shown that people remember 10% of what they read, 20% of what they hear, and 30% of what they see. The percentage increases to 70% when they see and hear the information. A good presentation has good visuals and a well-prepared speech.

This is the standard first slide of a PowerPoint presentation.

### The Title Bar

The Title bar is located at the top in the center of the PowerPoint window. The Title bar displays

the name of the presentation on which you are currently working.

The Ribbon

- 1 Tabs
- 2 Command Group
- 3 Command Buttons
- 4 Launcher

You use the Ribbon to issue commands. The Ribbon is located near the top of the PowerPoint window, below the Quick Access toolbar.

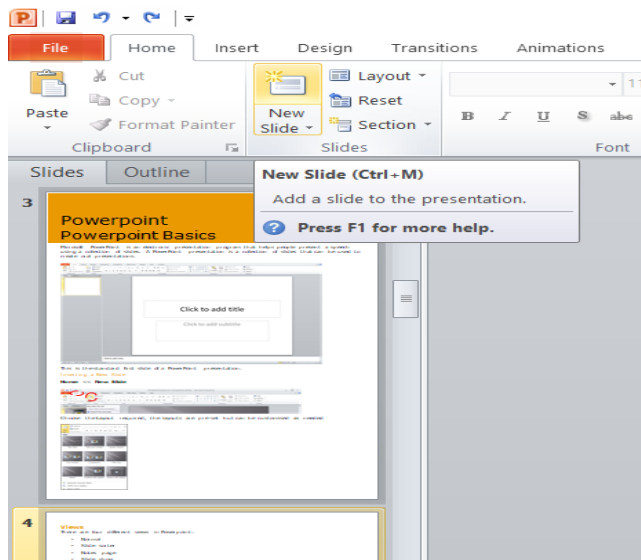

## Rulers

Rulers are vertical and horizontal guides. You use them to determine where you want to place an object. If the rulers do not display in your PowerPoint window:

1. Click the View tab.
2. Click Ruler in the Show/Hide group. The rulers appear.

## I -Inserting a New Slide

Home << New Slide

Choose the Layout required, the layouts are pre-set but can be customized as needed

## II- Views

There are four different views in PowerPoint:

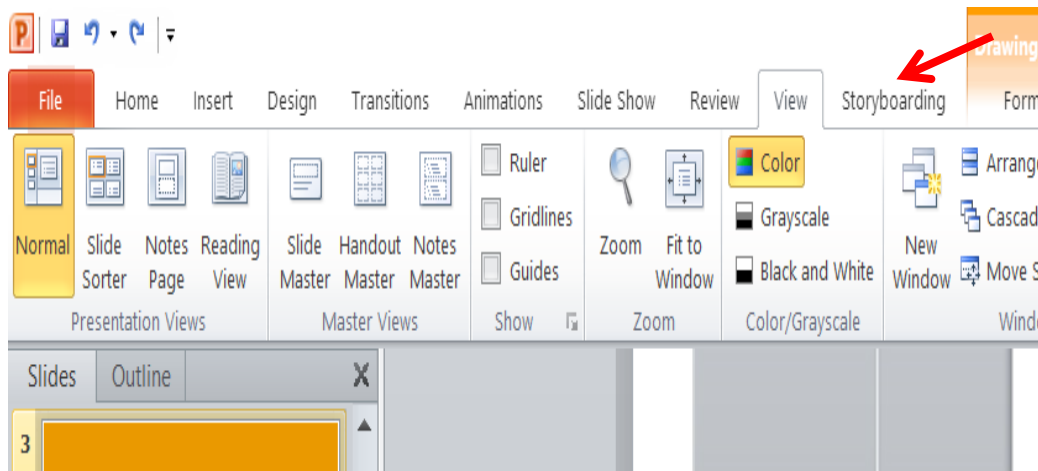

- Normal
- Slide sorter
- Notes page
- Slide show

Each view is used for a different step in creating your PowerPoint presentation.

### Normal View

**View >> Normal**

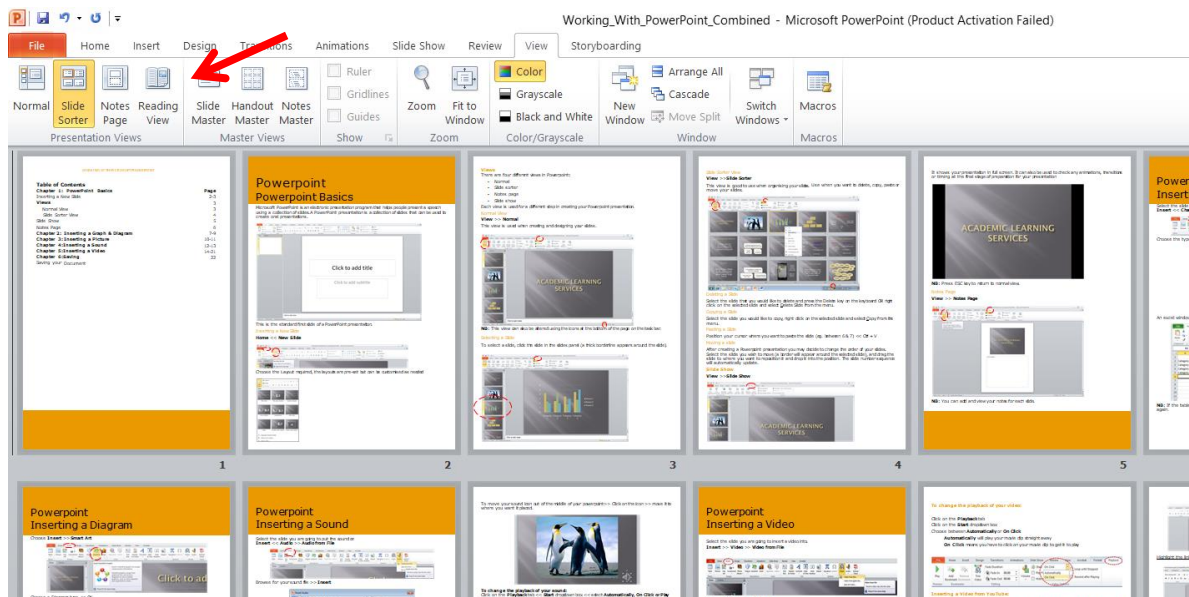

This view is used when creating and designing your slides.

### Slide Sorter View

**View >> Slide Sorter**

This view is good to use when organizing your slides. Use when you want to delete, copy, paste or Delete your slides.

## Deleting a Slide

Select the slide that you would like to delete and press the Delete key on the keyboard OR right click on the selected slide and select Delete Slide from the menu.

## Copying a Slide

Select the slide you would like to copy, right click on the selected slide and select Copy from the menu.

## Pasting a Slide

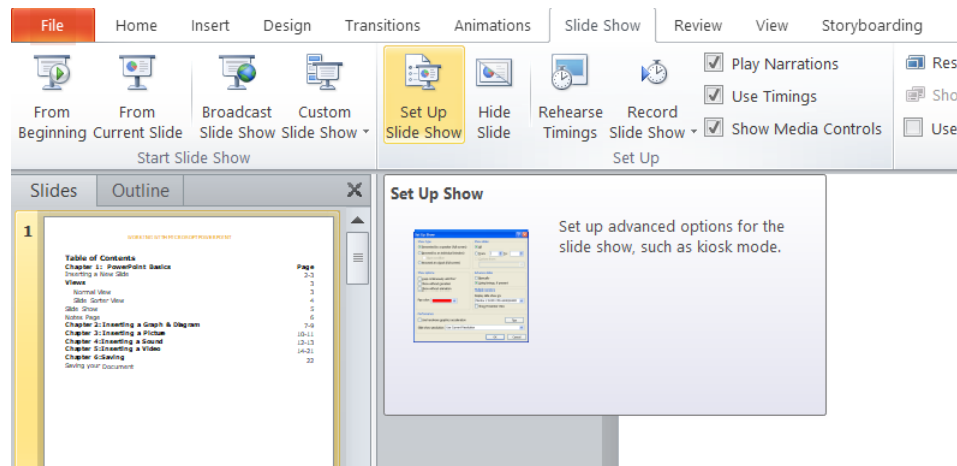

Position your cursor where you want to paste the slide (eg. between 6 & 7) << Ctrl + V

## Moving a slide

After creating a PowerPoint presentation you may decide to change the order of your slides. Select the slide you wish to move (a border will appear around the selected slide), and drag the slide to where you want to reposition it and drop it into the position. The slide number sequence will automatically update.

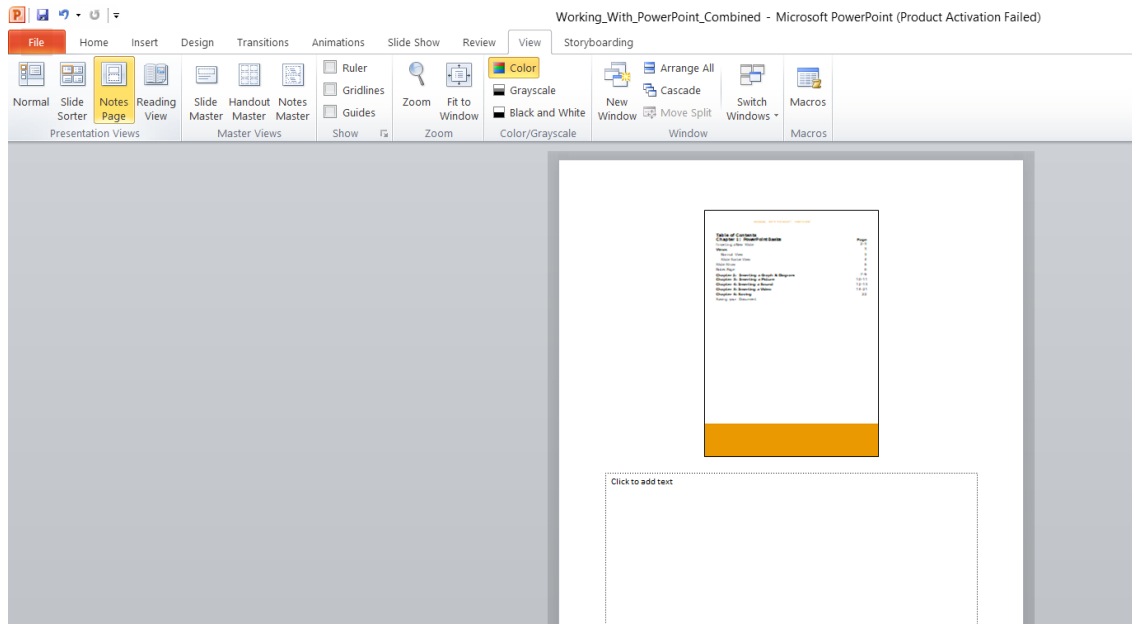

## Slide Show

View >> Slide Show

## Notes Page

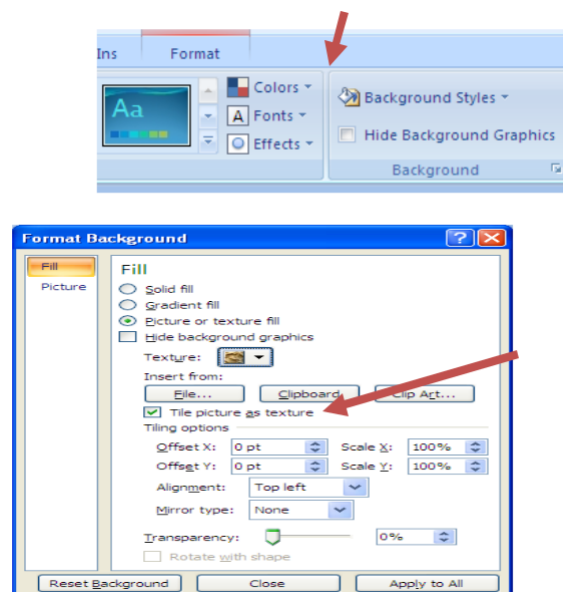

View >> Notes Page

Once a slide show is created, there may be a desire to make changes to the appearance. This can be done by changing the appearance of the text on each slide, or changing the appearance of the slide itself.

## Changing Colour

1. Under the Design tab, Hover the mouse over the different themes, and they will preview in the slide.
2. Left click on a theme, and all the slides should change colour.
3. Examine the different color options for that theme, under Colours and Background Styles

By clicking on the down arrow, a tab will open that will reveal more options for coloring, as well as inserting pictures as slide back-grounds.

5. Left click on any slide
6. Right click on one of the themes, and select Apply to Selected Slides

This option allows different themes for separate parts of the slide show.

### Lab Task:

Create a power point presentation that contains 5 slides. The layout of each slide is described below.

- First slide of the presentation should have the title layout.
  - Second slide should have title and content layout.
  - Third slide should have section header layout
  - Forth Slide should have comparison layout.
  - Fifth slide should have two content layout.
1. Compare any two things in comparison layout with images.
  2. Write your biggest five fear while doing presentation in second slide with an appropriate title.
  3. Apply gallery theme on all slides.
  4. Change the color of slide 4 to red.
  5. Take a screen shot of slides in a slide sorter view and save it.

Note (Write dummy text in the title, content, section header and comparison)

### Submission Guidelines:

Save your screenshot with the naming convention RollNo\_Section.docs and upload RollNo\_Section.docs and RollNo\_Section.ppt on google classroom.
